---

Sandy,

I think you covered it. My recollection of the discussion of the creeks was relative to those that are piped (e.g., Salzman) and that they should be included in the seep assessment. I am not aware of any specific creek data other than Doane Cr (Outfall 22C). Eric, can you help Sandy out here?

Matt

**Subject:** "Seep" Data

Matt,

I have requested seep data from those LWG parties you indicated have or may have done some sampling. I was wondering if you could confirm my list and see if I've missed anything.

1) Gunderson - received data for SEEP-01, -02, and -03 as well as outfall sampling as part of their stormwater study.

2) NW Natural - Sent me stormwater sampling results for Outfall 22C

3) Rhone-Poulenc/Bayer - Sent me stormwater sampling results for Outfalls 22B and 22C.

I asked the City for any data they may have for 22B and 22C and they said they didn't have any beyond their outfall study. They also said they didn't have any data collected from Salzman Creek or any other creek. Do you have any idea what Eric was talking about relative to creeks?

4) ExxonMobil - you provided the data, thanks.

Do I have everything?

Sandy
